## GET READY FOR LIFT OFF!

The Aviation Science Program is designed to prepare students interested in aviation for a variety of post-secondary programs leading to careers in the industry including commercial pilot, FAA certified mechanic, aviation administration and more. As a partner Embry Riddle Aeronautical University, this program track allows students to complete 24 dual enrollment college credits that will prepare them for college, post-secondary technical programs, or military careers. Depending upon the specific area of interest, academic courses are available at all levels of instruction, with students receiving core Aviation courses which include such topics as topics as flight theory, navigation, aerodynamics, history of flight, and meteorology.
