

AP Psychology:

1] "40 Studies That Changed Psychology." Any edition. Students need to purchase the book. Students can buy a used copy on Amazon for under \$10. Work must be handwritten. For each study the students need to:

1) Summarize the study. 2) Discuss the significance of the study. 3) Discuss the real world application of the findings. The first 10 studies are due, but I HIGHLY recommend you complete all 40.

2] Read and outline Unit 1 in the textbook. Any outline format is acceptable but should be a minimum 5 pages in length and must be handwritten. Students will be tested on Unit 1 on the second day of class (block schedule).

AICE Global Perspectives:

Students will study MLA format using <https://owl.english.purdue.edu/owl/section/2/11/>. There will be a test the first week on using citations and quotations.
