

Advisory Committee Groups-School Board Joint Discussion

The following process was developed and directed by the members of the School Board during deliberation of agenda item #1- Quarterly School Board Advisory Committee Discussion at the March 20, 2024, School Board Workshop.

Advisory Committee Group Recommendations

effective as of the May 21, 2024, RSBM

1. All committee recommendations will be placed as one item in the "Chief Communications and Legislative Affairs" agenda section.
2. They will be included in the **initial** agenda delivery two weeks prior to the scheduled meeting.
3. The requested action is for the Board to *receive* the recommendation requests submitted by the respective advisories and committees.
4. The executive summary will include the recommendation language and information provided by staff for the Board's consideration.
5. After reviewing the recommendation language and the information provided by staff for the Board's consideration, if Board members wish to make motions on specific advisory or committee recommendations, the respective Board member will create a separate BB-item outlining the requested action. The item will be processed and distributed with the supplemental agenda delivery. By creating a separate Board item, this will help inform the respective advisory committee and the public of the requested actions for that particular committee recommendation.
