Understanding Key Terms

Scale Scores provide a single, consistent way to measure growth across grade levels and domains. You can use a scale score to compare a student's growth on different administrations of *i-Ready Diagnostic and Instruction*.

Placement Levels are used to guide instruction in the classroom. Placement levels are based on KHALIL's level of performance overall and on each subtest, and they describe the optimum instruction level. The four possible placement levels are:

Foundational Domains are not assessed for all grade levels. These subtests are given depending on your child's scores in other domains. "Tested Out" means that your child did not need to take a particular subtest. "Max Score" means that your child took the subtest and achieved a high score.
