Community Foundation of Broward Supports BCPS Middle School Students

The Community Foundation of Broward (CFB) has made the largest grant in its history, **\$3 million**, to the District for the Reimagining Middle Grades (RMG) initiative that is intended to change the way curriculum is delivered in the middle grades environment. RMG will focus on the transition to project-based learning that will engage every student and give them a deeper understanding of career pathways, issues the community confronts, and exposure to electives, while simultaneously providing wrap-around services and social-emotional learning. Grants Administration & Government Programs staff worked in collaboration with the Office of Academics, the Office of School Performance and Accountability, and Student Assessment and Research to develop the grant application. Thank you, CFB, for being a valued partner.

Grant Writer in Action

Name: Dona Maggio

Position: Media Specialist, Coral Springs High School

Years of service: 21

How many grants have you been awarded and what is the total dollar amount awarded? Over the last 21 years in Education, I've written numerous grants averaging approximately \$5,000 a year which is over \$100,000 in grant funding for various programs and schools in Broward County.

Which grant-supported project is your favorite? I really like them all and get excited about the opportunities and projects grant funding allows me to pursue. I've received grants for professional development, school beautification, school library grants and various projects. I have worked at a center school for students with disabilities, and at the elementary, middle and high school levels. I feel it is important to note that the funding I have received for materials, technology and curriculum stays at the school I originally wrote the project for. Since I write grants for projects to benefit a specific group of the students, staff or school; the materials stay at that school to continually benefit that community even though I've moved to a different location. I know that is not required it's my way of giving back because I truly love all of my past school communities.

What is your process for filling out a grant application? First, I read through the entire grant application so I am aware of all the questions as I am writing. It's important that your project objectives, purpose and budget are all tied together. So, if you are asking for funding for technology you should really have an objective and purpose that connects to students using technology. I like to give brief examples explaining the need for funding or to use educational research to back up my request.

Do you have any grant writing tips? Read through the complete application, answer all questions as clearly as you can leaving out educational jargon or if needed spell out educational abbreviations. I also check the Foundation's or Organization's webpage to see if they give examples of past projects. This really helps me to get an idea of what kinds of programs they'll fund. Although I have written grants for the maximum amount allowed, for the most part I always choose a grant amount a little below the maximum. Whenever possible I let the grant reader know we would be appreciative of any amount awarded. That increases the odds of getting some funding if not the full amount requested.

Grants in Action

Grants are a powerful tool to enhance teaching and learning throughout our District. Please take the opportunity to have your grants showcased in one of our upcoming newsletters by submitting your photos with the subject line Grants In Action, and email your action photographs of activities associated with grant awards to grants@browardschools.com.
