

S.T.E.M. Challenge

Griffin Elementary is offering monthly S.T.E.M. challenges this year. These optional challenges are meant to be fun and are designed with family time in mind.

This Month's Challenge: Build a Bird Feeder

Discuss with your family what a bird feeder should include. Do some research. Then, look through your recycling bin and closets to see what you could use. Design and engineer your bird feeder. If it's ready, put it to good use. If you think it needs a re-design, do it and then put it to good use.

Take a picture of your family's new bird feeder. Send it, along with a brief description of the materials and your design, in a discussion post on our STEM CANVAS Course. See link below. Be sure to include your name, grade and teacher's name too.

Select bird feeder pictures and their engineers will be featured on Griffin's WGES.

Most importantly, have fun!

Sincerely,

Mrs. Bencivenga
