Why Sociology?

Beyond the course aims, sociology is a broad discipline that will expand your horizons.

At the AS level, students learn about the process of socialization and the formation of identity as well as the family, how it functions and its role in society. At the A level, students learn all this and more; including religion, media, education, and globalization.

Through discussion of sociological perspectives including Marxism, functionalism, feminism, and more, you will gain an increased awareness and understanding of the forces at work in society and the implications of social phenomena. Sociology is more than just an interesting class-- it will change the way you look at the world around you.
