

# URBAN TEACHER ACADEMY

Stranahan High School's UTAP creates a pipeline of highly-effective, future educators who help students develop the skills they need to excel. UTAP provides a rigorous curriculum and extensive field experience to prepare highly qualified candidates to enter the teaching profession. Higher education partnerships with Florida International University and Broward College offer Dual Enrollment options, which allow for a seamless transition to teacher preparation programs. Students are given actual "hands-on" opportunities to teach elementary or middle school students under the leadership of experienced teachers. Students will have many scholarship options when involved in the Future Educators Association organization and future employment with Broward County Public Schools.
