tools, tricks & ideas for your classroom

STEAM Projects

Ms. Frelove's 7th Grade Life Science students worked collaboratively to research and diagnose multiple types of diseases. Then, each group decided how to present their findings: poster, multimedia presentation, rap, etc. Click the video to see what one of the groups came up with. "WAY TO GO, MS. FRELOVE!" Science rules and so do you!

Virtual Math Manipulatives

Math Manipulatives

The Techie Teacher created this amazing resource which includes TONS of virtual math manipulatives. These are essential for homework and online learning, but also incredibly helpful during centers or other hands-on activities.

Monthly Celebrations

[International Stand Up to Bullying Day](#) is always the last Friday in February, so this year it will be celebrated on the 24th. Celebrate with your students by wearing **PINK** and click the link to learn why. Also, try having students create a **PODCAST** or **PSA** (Public Service Announcement) on their iPads to raise awareness about bullying and the many problems it causes.

BUILD STUDENT ENGAGEMENT

Flipgrid is a FREE online platform that allows students to respond to questions or prompts via video. It can be used on laptops or with the APP on iPads. It is simple to set up and can be used for every subject. It's also a great way to share your students' projects with families. Video length is from 15 seconds to 5 min. To give you an idea of how Flipgrid can be used click the video graphic.

To see student-created videos click this link:
