

Kamala Harris

Kamala Harris is a woman that fulfills the meaning of the word power. Without getting too political here, many can't fail to recognize the historical accomplishments Kamala has made for the black community. Harris is California's first Black woman district attorney and attorney general in history. The title nevertheless is on a high pedestal but with the job comes characteristics of strength, courage, and determination. Harris's newly earned the title of being the first woman to hold the second-highest office in our great nation to our 46th president of the United States Joe Biden. Such accomplishments pave way for the black communities and raises inspiration for those women who aim to succeed regardless of the color of their skin.

Throughout history, women have battled misogyny and racial discrimination but rather than letting the cruelties of the world bring them down women like Harris encourage many more to take more prominent roles in society. Harris being a well-spoken African American next to the president of the United States sets the bar of encouragement for many young girls looking to accomplish their dreams ranging from doctors, lawyers, educators, scientists, engineers, members of the armed forces, textile workers, athletes, journalists, celebrities, industry leaders, human rights activists and politicians. Harris serves as a role model for the next generation of youthful leaders, reminding them that there is nothing too far to aim for especially for woman of color or mixed race.

Kamala Harris's role in society affects many around the globe when deciding the opportunities are limitless and the goals are realistic. Go Kamala!
