

Coral Springs High School

Accelerated Programs for Grades 9-12

Cambridge Advanced International Certificate of Education (AICE)

AICE provides an advanced academic pre-university qualification for students who are studying Cambridge International A and AS Levels. The Cambridge AICE program offers students the opportunity to tailor their studies to individual interests, abilities, and future plans. The program combines breadth of study with choice and flexibility. The Cambridge AICE program involves the selection of subjects from three curriculum areas: Mathematics and Science, Languages, and Arts & Humanities.

Advanced Placement (AP)

The Advanced Placement (AP) Program provides college-level courses and exams in various subject areas for students in secondary schools. More than 2,900 universities and colleges worldwide grant credit, advanced placement, or both to students who have performed satisfactorily on the exams, and approximately 1,400 institutions grant sophomore standing to students who have demonstrated their competence in three or more of these exams.

Dual Enrollment (DE)

Dual enrollment is a program that allows high school students to simultaneously earn college or vocational credit while also earning credit toward a high school diploma. Dual enrollment courses are free. Instructional materials (such as books) are provided to public school students free of charge; however, students enrolled in home education programs or nonpublic secondary schools must provide their own materials.

Plan for the Future

Coral Springs High School strives to provide excellence in education as we prepare our students for college, career and life! One way we achieve this goal is through our AICE, Advanced Placement and Dual Enrollment courses. These accelerated programs offer our students the extra challenge and rigor needed to prepare them for their futures on a global scale. Students who are enrolled in these courses are able to explore their interests and passions while also creating an impressive academic record for college. Here are more reason why students should choose Accelerated Programs.

- Students develop college-level academic skills, such as critical thinking, independent thinking, the ability to evaluate information, and the skill to communicate logically and clearly.
- Students save money by taking college classes during high school.
- Students can explore subjects more deeply before reaching college.
- Students develop the confidence needed to work with college-level information and ideas.
- Students feel challenged with the rigorous content.
