

Why Quantum Leap?

Our Program

We guide our students to reach their optimum potential intellectually, physically, and socially. Each of our Quantum Leapers is challenged to think critically and creatively in an academic environment where excellence is the standard.

1. We recognize, encourage, and reward individual academic efforts.
2. We understand that the rate of development in each student varies from academic to academic. Therefore we have designed a system to help each student realize his/her maximum potential.
3. We are dedicated to academic excellence and do not devalue the efforts inherit to that pursuit. Thus, we instill in our Quantum Leapers that making good grades without challenge is meaningless.

Quantum Leap

We are confident that no other educational institution will top our heartfelt commitment to creating an academic system that enables students to reach beyond their comfort levels to achieve real academic success.

Quantum Leap Program

*Leading in
Exceptional
Academic
Preparation*

Coral Springs High School

Quantum Leap Revitalized

We aim to increase instructional **quality, rigor, and challenge** for all students by reducing content repetition and establishing a program that thrives on a seamless education; thus, we created a vertically aligned honors program beginning at the elementary level:

Quantum Leap (Grades 9-10):

For students who are motivated and prepared to meet and exceed our standard of excellence in the areas of math, science, English and History and in all academic electives.

Pre-Quantum (Grades 6-8):

For students who meet the Quantum Leap requirements and are prepared to continue in a rigorous college preparatory program.

Junior -Quantum (Grades 3-5)

For students who are interested in being part of a unique honors program that prepares its students for the leap necessary at each level through teacher collaboration and student engagement.

Through tracking, we challenge students to maximize their potential to work with other Quantum Leapers who have similar skills and abilities.

Quantum Leap Curriculum

Our curriculum is designed to develop the superior academic skills necessary for future success. Thus we will:

1. Evaluate your child's progress to ensure proper placement within our program. We want your child to have the right balance of challenge and support.
2. Provide a well-defined curriculum so that your child is aware of our expectations.
3. Provide a rigorous and challenging college- preparatory program thriving on differentiated instruction.
4. Encourage academic efficiency and effectiveness.

About Quantum Leap

Quantum Leap is an integrated honors program that is designed to appeal to motivated, college-bound students. The curriculum for this program with consistent focus on rigor and relevance promotes and cultivates academic excellence in all areas of academia. Our curriculum also serves as a pathway to a successful transition into post secondary education. We are committed to the development of future leaders.

Background

Quantum Leap began in 1991 as an innovative response to the growth of school size and the desire to meet the needs of the top tier students. This program was modeled after studies that showed that smaller learning communities generated more success in high school students and beyond.

The Success of Quantum Leap

- Valedictorians and/or Salutatorians have been QL students since the inception of the program.
- Silver Knight winners have been QL students.
- The Top 20% of students are QL students.
- Over 90% of the school leadership is made up of QL students.
- QL students are accepted into top tier universities

Our Quantum Leap Professionals

Our professional team of leaders is groomed to provide the very best academic challenge. All lessons are delivered by our exceptional group of qualified instructors through a variety of methods, mainly 'hands on' experiences. We have over 70 years of combined teaching experience pumping through our Quantum Leap Program. As leaders, we know that it's hard being the best—but at Coral Springs High School *it's tradition!*
