Other things to remember...

- 1) Listed above are the common pre-requisites for most universities. A student/advisor should always check with the university directly that a student thinks he/she will transfer to confirm the courses needed for a program.
- 2) Nova will only accept 60 credits for a community college. Encourage students to complete what they can here and transfer.

Pre-Professional Majors

Law School

- If a student says they want to go to law school, he/she can choose any Bachelor's degree as law schools look at GPA from the Bachelor's degree and the LSAT scores. Common majors that are chosen, though, can include but are not limited to English, Political Science, Business, Criminal Justice, History, etc.

Dental/Medical/Veterinary School

- A student can technically choose any Bachelor's degree to major in but Biology and Chemistry are what we recommend so that a student can be prepared for the exam that must be taken to be able to apply to these types of programs. (Dental – DAT, Medical – MCAT, Veterinary - VCAT)

Physical Therapy (Doctorate)

- There is no Bachelor's degree in Physical Therapy.
- The requirements to get into the programs normally include having a Bachelor's degree in any discipline and the required prerequisites completed (should check with the university that student will be applying to)

- Common Bachelor's degrees that can be recommended include...
 - FAU – Bachelor's Degree in **Exercise Science and Wellness** (courses for the program are very Physical Therapy related)
 - UCF – Bachelor's Degree in **Health Sciences** (program says it is designed for students pursuing professional degrees such as Physical Therapy, Occupational Therapy and Physician's Assistant)
 - Many students often choose some kind of **Psychology** Bachelor's degree and complete the prerequisites for the program.

Speech Pathology (Master's)

- There is no Bachelor's degree in Speech Pathology. A student needs a Master's for this degree.
- The closest Bachelor's degree to this major that is near is at UCF – **Communication Sciences and Disorders**.
- If a student does not pursue a Bachelor's degree that is related to Speech Pathology, then the student will have to complete some Master's level courses before being able to start a Master's in Speech Pathology. See university for more details.

Pharmacy

- There is no Bachelor's degree in Pharmacy.
- A student can choose Biology as a Bachelor's degree and then apply to pharmacy school. There are other prerequisites besides what is needed for Biology.
- Nova will allow you to apply to the Pharmacy school there after 90 credits have been completed (only 60 from a community college are accepted).
- Only a few schools have Pharmacy – UF, FAMU, and Nova

Occupational Therapy (Master's)

- There is no Bachelor's degree in Occupational Therapy.
- To be accepted to the program, you must have a Bachelor's degree along with the prerequisites.
