

SILVER TRAIL MIDDLE SCHOOL

“Home of the Mustangs”

2021-2022 School Year EIGHTH GRADE COURSE DESCRIPTIONS

Concert Band

The Concert Band is for students in the 7th or 8th grade wishing to learn to play an instrument. This class will develop the basic fundamentals of tone production and musicality. The Concert Band also serves as the tool for students who would like to learn to play a secondary instrument. Concert Band is a **full year** course and will meet daily.

Symphonic Band

The Symphonic Band provides instruction in musical style and basic music fundamentals. This ensemble continues to develop the techniques learned in the beginning band. As a member of the Symphonic Band, students will begin to focus on the fundamentals of playing as an ensemble. Students in this group perform an average of three times per year outside the regular school day. **Teacher recommendation is required.** Symphonic Band is a **full year** course and will meet daily.

Wind Ensemble

The Wind Ensemble provides instruction in musical style, tone production and ensemble playing. This ensemble is the top-performing ensemble and is available to seventh and eighth graders. Members of this ensemble frequently attend rehearsals and performances outside of the regular classroom and school day. **Teacher recommendation is required.** Wind Ensemble is a **full year** course and will meet daily.

CS Discoveries

The CS Discoveries computer course is designed as an introduction to computer science appropriate for grades 6 – 8. In this hands-on coding class students will be introduced to HTML coding and web design through lessons on problem-solving, creation and collaboration. Students will learn the basics needed to incorporate web page elements, color, and integration of multimedia into their coding. Topics such as Digital Citizenship, Career Exploration, Plagiarism and Fair Use will also be introduced. CS Discoveries is a **full year** course and will meet daily.

Debate I Honors

The purpose of this course is to introduce students to the competitive debate events, as sanctioned by the National Speech and Debate Association. Students will continue to develop their awareness, understanding, and application of competitive debate skills such as research, writing, and speaking. To receive the high school Honors credit, out of school participation is **MANDATORY**. **The prerequisite for this course is Speech 1**. Debate I Honors is a **full year** course and will meet daily.

Global Scholars

Would you like to have an opportunity to connect with your peers around the world? Global Scholars allows students to do just that! Global Scholars is an international digital exchange program for middle school students in cities around the world. Each year, the curriculum focuses on a topic of current interest. Each unit explores an aspect of the main theme where students will participate in various activities and global discussions culminating in a project-based outcome. Students will engage in building critical thinking, writing and speaking skills, using technology skills, while collaborating and creating innovative projects. Global Scholars is a **full year** course and will meet daily.

IC3 – Key Applications – Year 1

Technology is fast becoming an important part of school, career and everyday life. Every aspect of our day involves some use of technology. The IC³ Curriculum provides students with exposure to the most relevant knowledge needed to interact with the digital tools they face each day. This course will focus on the Key Applications used globally in school and work settings: Word, PowerPoint, Excel, and Access. Students will learn how to use word processing, presentation, and spreadsheet software to edit documents, organize data, create simple charts, and design a basic presentation. At the completion of this course students will be prepared to take the IC³ Key Applications exam. IC3 is a **full year** course and will meet daily.

IC3 – Living Online – Year 2

In a world where every aspect of the day involves interaction with technology, the Living Online course provides students with exposure to both online and networked working environments. Through a hands-on lab style course, students will learn about communicating and working in a collaborative digital world. Topics such as networks, Internet, electronic communication will be covered within this course. Additionally, students will be exposed to information related to Digital Citizenship, Career Exploration, Plagiarism and Fair Use. Students will also learn to use HTML coding as they explore the Internet from both the user and creator perspectives. At the completion of this course students will be prepared to take the IC³ GS5: Living Online exam. IC3 is a **full year** course and will meet daily.

IC3 – Computer Fundamentals – Year 3

Learning the ins and outs of computers is the focus of the Computing Fundamentals course. Students will learn about and use computer operating systems to perform everyday tasks like managing files, downloading and installing software, and changing system settings. Students will also learn about peripheral devices and the newest components of modern technology from printers to scanners and game controllers, including how to troubleshoot problems, maintain equipment and protect devices from theft and damage. IC3 is a **full year** course and will meet daily.

Latinos in Action (LIA)

This course offers an asset-based approach to bridging the graduation and opportunity gap for Latino students, working from within the educational system to create positive change. The goal is to empower Latino youth to lead and strengthen their communities through college and career readiness. We accomplish this by focusing on four pillars: leveraging personal and cultural assets, excelling in education, serving the community, and developing leadership skills. The robust LIA curriculum empowers students as leaders who visit local elementary schools in an effort to not only increase literacy rates of those who are struggling, but to act as role models. A mentor system is used by LIA to encourage peer growth and help students learn leadership skills. While this unique approach seeks to bridge the graduation and achievement gap Latino students generally experience in the United States, LIA is also a fun and interactive class that provides students with college, career, and life readiness skills. LIA is a **full year** course and will meet daily.

Peer Counseling - I and II

Peer Counseling involves students interacting with peers in a structured setting. Peer Counselors receive training to develop and enhance leadership skills as well as effective listening and communication skills. These skills enable the trained counselors in assisting and providing a support role to their peers with minor problems. They will also implement school-wide projects related to current social issues affecting today's youth. Peer Counseling I and Peer Counseling II is a **full year** course and will meet daily.

Physical Education

The physical education program consists of a variety of instructions in physical fitness, lifetime and leisure activities, individual, and dual and team sports. PE is a **full year** course and will meet daily.

Spanish I

The purpose of this course is to introduce students to the target language and its culture, and to develop communicative skills and cross-cultural understanding with an emphasis on both oral communication and writing skills. The content includes, but is not limited to work in listening, speaking, reading, and writing, as well as vocabulary and grammatical concepts. Students enrolled in this **full year** course will have the opportunity to earn **high school credit**. **Language Arts teacher recommendation is required.**

Spanish II

This course will reinforce and enhance the basic skills previously acquired in the target language. The content will include further development of listening, speaking, reading, writing and grammatical concepts, as well as a broader understanding of the target culture. Students enrolled in this **full year** course will have the opportunity to earn **high school credit**. Students enrolled in this course must have successfully completed Spanish I. **Spanish I teacher approval is required.**

TV Production

This is an elective course offered to 7th and 8th grade students. Students learn the basic elements of television production, including news reporting, the research process, video equipment operation, and digital video editing. The course also explores various aspects of television production as a career. In addition, students will have the opportunity to produce the Silver Trail Middle School Morning News Show on a daily basis. **A TV production application is required.** TV Production is a **full year** course and will meet daily.

Yearbook

This is an elective course offered to 8th grade students. Students will gain skills in the following areas: page design, advanced publishing techniques, copy writing, editing, and photography while producing a creative, innovative yearbook which records STMS memories and events. There is an emphasis on journalism skills in this class. Students will gain useful, real world skills in time management, marketing, teamwork, and design principles. **To apply, students must submit an application, with a writing sample and picture design.** Yearbook is a **full year** course and will meet daily.
