

Summer Math Pathway to Success

Pompano Beach High Math Department has exciting news for you and your child! We will be launching a Summer Math Pathway to all their math courses using Ck-12.org. This program will help your child to prepare for their next upcoming math course(s). It will also help to bridge any gaps that your child may have acquired along the way. Please encourage your child to sign up and complete the given assignments for their upcoming course(s). Directions are provided below.

Our Math Department is looking forward to working together next year to move all our students to the next level of academic success.

Math Department Chair,

Ms. Fisher
