PARENT/GUARDIAN NOTIFICATION OF PARTICIPATION IN THE SCHOOL BOARD OF BROWARD COUNTY, FLORIDA/ DILLARD HIGH SCHOOL RESILIENCY POLL

Dear Parent or Guardian,

Dillard High School 6-12, in partnership with Terrace Metrics, Inc., is proud to provide an innovative assessment service to students and families. This assessment is designed to examine the social/emotional strengths and needs of participating students in grades 3-12. This consent form will describe the purpose of the service. You can also view the following video as well:

<https://www.terracemetrics.org/consent-form/>

What are the Benefits of the Survey?

Research shows that schools play an important role in raising healthy children through the measurement and teaching of social emotional skills. Data from this comprehensive assessment tool gives us the ability to flag students who may be in need of intervention. Further, we would be able to identify students with strong social-emotional development. In addition, the data will help us design, implement and evaluate small group interventions that address specific student needs, as well as opportunities for students to enhance their personal strengths. Most importantly, this tool allows us to examine the needs of the **WHOLE STUDENT**, in combination with academic and other non-cognitive data.

What Should I Know as a Parent or Guardian?

- First, only students who have parent permission are allowed to participate in the assessment. To ensure that we get the highest participation rate possible, passive consent will be used. What this means is that if you **do not** wish to have your child participate, you must sign this form and have your child return it to his/her homeroom teacher within one week.

The School Board of
Broward County, Florida

- Second, the data is de-identified, that is, all scoring and coding of data is done using student ID numbers. Your child will not enter any personal information when completing the assessment.
- Third, only designated members of our school's response team (e.g., counselors, administrators) will have access to your child's individual report. Teachers will not have access to individual data.
- Fourth, the assessment is not a diagnostic tool, and no information from this assessment will be placed into your child's education file. The purpose of this service is to inform us of how each student is functioning within specific resiliency/risk indicators.
- Fifth, you will receive a customized, easy to follow report of your child's results, along with specific recommendations that correspond with the findings.
- Sixth, the school will not allow the collection, disclosure, or use of personal information collected from students for the purpose of marketing or for selling that information (or otherwise providing that information to others for that purpose).
- Finally, the tool itself is brief (approximately 10-15 minutes).

Between November 1, 2021 – May 6, 2022, your child will have the opportunity to participate in the [fall/spring] administration of the survey. The following areas may be assessed, as determined by your child's grade and wishes of the school and school district:

Grades 6-12

- Global Life Satisfaction: Overall assessment of feelings and attitudes about one's life at a particular point in time, ranging from negative to positive.
- Positive School Experiences: Assessment of a student's experiences with their learning, as well as their overall interactions with school personnel.
- School Victimization Scale: First presents a definition of bullying so that students understand what/what does not meet criteria. The student is then asked if they have been victimized or have victimized others during the current school year. The scale assesses frequency of different types of victimization (e.g., physical, social).
- Social Ostracism Scale: Items reflect the degree of perceived social isolation. The scale measures two forms of ostracism: ignoring (paying no attention to the student) or excluding (acknowledging the student but choosing not to interact with them).
- Grit Scale: Assesses the level of commitment (and tenacity) to achieve a long-term goal.
- Generalized Anxiety Scale: 7 item, self-reported questionnaire for screening and severity of anxiety.
- Children's Hope Scale: Assesses goal-directed thinking in which the student has the perceived capacity to find routes to goals (pathways thinking), and the motivation to use those routes (agency thinking).

Broward County, Florida

- Depression: The scale is a multipurpose instrument for screening and assessing the severity of depression symptoms. The scale also includes an item that assesses thoughts of self-harm.
- Resiliency: This scale assesses the degree to which individuals possessed both the intrapersonal and interpersonal resources needed to overcome adversity.
- Child and Adolescent Leadership Scale: This scale assesses students' perceptions of their ability to influence others.
- Personal Standards: This scale assesses the expectations that a student has about their personal abilities.
- Self-Criticism: This scale assesses difficulties accepting mistakes and overly focusing on one's perceived faults.

Supplemental Scales (per request of school district)

- Trauma Screener: This brief screener provides a list of potentially traumatic events (such as a car accident). If a student endorses yes, follow-up questions assess how well the student has adjusted to the experience.
- Drug/Alcohol Screener: This screener first asks the student if they have engaged in alcohol or drug use in the past year, or whether they have ridden in a car with someone who has. Follow-up questions assess the frequency of use and whether this use has caused problems for them.
- School Violence Screener: This screener assesses a student's tendency to use aggression as a means to resolve problems at school.

Grades 3-5

While schools can select all indicators noted above, the following are typically administered to younger children:

- Global Life Satisfaction: Overall assessment of feelings and attitudes about one's life at a particular point in time, ranging from negative to positive.
- Positive School Experiences: Assessment of a student's experiences with their learning, as well as their overall interactions with school personnel.
- School Victimization Scale: First presents a definition of bullying so that students understand what/what does not meet criteria. Definition has been framed so that students as young as grade 3 can understand. Student is then asked if they have been victimized, or have victimized others during the current school year. The scale assesses frequency of different types of victimization (e.g., physical, social).
- Social Ostracism Scale: Items reflect being ignored by others.

THE SCHOOL BOARD OF BROWARD COUNTY, FLORIDA

The School Board of
Broward County, Florida

- Children's Hope Scale: Assesses goal-directed thinking in which the student has the perceived capacity to develop strategies to reach goals (pathways thinking), and the motivation to use those strategies (agency thinking).

Our response team members will receive individual student reports immediately after the student completes the assessment. They will then review each report to determine the next steps for each student. If there are any concerns regarding your child's responses, a member of the school's response team will contact you by phone to discuss next steps. As a reminder, student reports will not be shared with teachers; only authorized response team members will have access to that information.

Remote (at-home) Administration

Dillard High School may use the system for students who are homebound. Should your child complete the assessment at home, this is what will occur:

- You will be notified of the date and time that your child will complete the assessment. At the scheduled time they simply need to be in front of a computer (desktop or laptop) or portable device (iPad).
- Your child will then access the online platform used by Dillard High School.
- Once online, a proctor (who will be present during the administration) will send your child a message to their school email. If your child does not have an email, the proctor will provide them with a specialized code and instructions on how to log into the assessment site.
- Your child simply clicks on the code sent to their email or enters the keycode given to them from the proctor. Completing this step will take them directly to the assessment.
- After the proctor reads the instructions, your child can begin. The proctor is available should your child have any questions.
- The response team will receive individual student reports immediately after the student completes the assessment. If there are any concerns regarding your child's responses, a member of the school's response team will contact you by phone to discuss next steps.

If you do NOT wish to have your student participate in Dillard High School Resiliency/Risk service, you must sign and return this form indicating your refusal to grant permission. The form must be returned to the school by January 18, 2022.

STUDENT NAME:

_____ (“Student”)

I _____ am the parent/guardian of Student and
refuse permission for Student to participate

My consent shall be refused until such time as I provide written consent for my student to
participate.

Signature of Parent/Guardian of minor, if required

Date of Consent Refusal
