

# Welcome to AP Environmental Science!

You will need to be added to a Canvas course for the summer work in Mrs Baig's AP Environmental Science course. Please email Mrs Baig at [Lisa.Baig@browardschools.com](mailto:Lisa.Baig@browardschools.com) as soon as possible with your name and student number so she can add you.

Once she has added you, to access the course, please log into your SSO, and use the Canvas badge for log-in. You may see a prompt asking if you want to be added to the course- if so, click "accept" or "yes" as appropriate to the prompt. Otherwise it will appear as one of your tiles on the dashboard. This Canvas page has all work, and access to the eTextbook for this course.

You have 7 assignments for summer work. All work is due by September 15, 2019.

- **AP Environmental Science Pre-test**
- **Introduction to Mastering Environmental Science**
- **Mathematics Skill Review**
- **Chemistry Review**
- **Chapter 1- Introduction to Environmental Science**
- **Chapter 6- Environmental Ethics and Economics**
- **Chapter 7- Environmental Policy and History**

These assignments include a measurement of pre-knowledge of course content, walkthroughs of how to use the online textbook materials, graded refreshers of skills/knowledge you should know before entering this class, and reading/comprehension of selected chapters within the textbook. This content will be in the first unit test of the year with a small amount of time to review it.

*Also as a reminder- there are Pre-requisites for this course. You must have taken the 2 classes below before enrolling in AP Environmental Science. Failure to meet these requirements will result in removal from the class.*

- *Biology*
- *Chemistry (may be co-enrolled with previous science teacher recommendation)*
