

### College Academy at Broward College REMOTE LEARNING Schedule

College Academy students should follow their class schedule for all classes and log into D2L during their scheduled class times. For example, if you have Professor Desrosiers for Trigonometry at 1pm – you should log in to D2L at 1pm to meet with Professor D- virtually!

Classes restricted to College Academy students and a College Academy instructor will meet with their instructor remotely during regular class times using one of two remote learning platforms – Zoom or Blackboard Collaborative. Your professors will have the instructions for accessing these platforms on the D2L announcement page. These two remote learning platforms will allow the student to see and hear the instructor and interact with the instructor and classmates. It is like being in class – separate, but together! Assignments will be submitted through D2L. The great news is that most BC instructors and courses have integrated D2L into their course structure, so our students are familiar with this technology and learning system.

In addition to a structured learning environment, students at the College Academy will continue to have support! Each instructor assigned to a College Academy restricted course will have virtual office hours. Below is the list of all instructors and when/how students can contact them for assistance. We recommend printing this chart for easy reference or downloading it to save on the student desktop. For any course – CA restricted or not, the best course of action for any course related question or concern is to contact the instructor. If you do not get a response after 48 hours, please send your concern to your campus School Counselor.

The College Academy Guidance staff will also continue a high level of remote support. Their contact information is also listed below. School Counselors and BRACE advisors will continue their guidance delivery using Zoom for individual appointments and group sessions. We have practiced using these new platforms all week and are ready to GO!!!

### College Academy Contact Information for Instructors & Guidance Staff

Instructors	Contact Information/Office Hours Information
