Dear Parents and Guardians,

Research shows that students lose about two months of grade level equivalency in mathematical computation skills and reading comprehension over the summer months. Intentional practice of math and reading skills will help students reach mastery of required material in the upcoming school year.

For this reason, the math and ELA department encourages students to participate in our summer enrichment program available through Khan Academy. **Our summer math/ ELA program is OPTIONAL and allows students to practice skills they have previously learned.**

For math, most of the assignments are between 4-7 questions. Students who complete at least 25 of the assignments with a passing score of 75% or better will be eligible to receive extra credit. The more assignments completed, the more extra credit your child will receive. Reading students will complete three units of study. Each unit consists of 5 lessons with a 4-question quiz at the end of unit. Students must score 75% or higher on the 15 quizzes from all three units. Scores below 75% will not be considered for extra credit.

Summer Math/ ELA assignments will be **due Tuesday, September 3, 2024**. Extra credit will only be issued in Quarter 1 of the 2024-2025 school year. Students will have to submit an assignment report through Canvas to their 2024-2025 Math and ELA teacher. If your child needs assistance with the material, there are support videos with Khan Academy for remediation.
