

In the 2023/24 school year, sixty-seven Broward County Public Schools meet the School Board Policy 5000 threshold of under-enrollment of permanent capacity utilization below seventy percent. This list includes forty-five elementary schools, sixteen middle schools, five high schools, and one combination school. These sixty-seven schools represent 31.9 percent of the District's total 210 elementary, middle, high and combination schools, and 64.9 percent of all unfilled seats in the District's permanent capacity. Please note that center schools, which may have multiple daily sessions and/or adult enrollment not reported in TERMS, are not included in this list, as their capacity usage may not be accurately captured in standard reports. Also not included in this report are charter schools, whose capacity is not included in the Florida Inventory of School Houses (FISH).

It is very important to note that the attached report does not in any way constitute a list of schools identified for repurposing or consolidation, and does not imply any change or action on the part of the School Board is required to remedy under-utilization. As Broward County Public Schools enters into the development of a comprehensive facilities master plan, identifying available space for new programs, shared community uses, and income-generating lease opportunities will be critical information for School Board Members as they make decisions that will transform the District to meet the needs of students today and in the future.

Total		42,558	72,428	(29,870)	58.8%

*Mary M. Bethune Elementary capacity reflects the planned removal of original buildings which have already been replaced with new capacity.

Tedder Elementary is not included in this list as it has significant redundant capacity in unusable buildings that have been intended to be demolished for many years, but still remain in FLDOE's calculation of permanent capacity student stations. With the removal of these 446 student stations, capacity utilization at Tedder Elementary in the 2023/24 school year would be 78.7%.

Data source: September 11, 2023 Benchmark Day Enrollment from TERMS; Florida Inventory of School Houses (Florida DOE Permanent Capacity without Relocatables) reported by Facility Planning & Real Estate Department, September 1, 2023.
