SUBJECT: THE COGNITIVE ABILITIES TEST™ (CogAT®) SCHOOL YEAR 2023

Each year, Broward County Public Schools (BCPS) administers the Cognitive Abilities Test™ (CogAT®) to all second-grade students. The CogAT® is used as a universal screener to identify students who need gifted services, detect differences between ability and performance, and provide valuable information about students' level of cognitive development to inform differentiated instruction¹.

This memo, the snapshot, and the attached appendices summarize student participation and results from the CogAT® administration in the 2022-2023 school year.

CogAT® Results School Year 2023

Gifted Screening

With the adoption of the 2027 Strategic Plan, the District has prioritized increasing the percentage of underrepresented (Free and Reduced Lunch and English Language Learners) students who are placed in the gifted program. The results of the CogAT® have been used as a universal screener in BCPS to identify gifted students, particularly from under-represented populations, since 2011.

CogAT® Plan A School Year 2023

Eligibility for Plan A requires an age percentile rank of 97 or higher on the three batteries of the CogAT® (Verbal, Quantitative, and Nonverbal (VQN)). Of the 12,859 students who took all three batteries of the CogAT®, 242 (1.8%) achieved

a composite score on the VQN batteries with an age percentile ranking of 97 or higher. This represents an increase of 55 students compared to the 2021-2022 school year. Of those 242 students, 106 (43.8%) had previously been identified as gifted students. Thus, 136 Plan A students were identified for further screening for gifted eligibility through the 2023 administration of the CogAT® (See Table 1). Subsequently, 50 (36.7%) students who qualified for Plan A were referred, screened, and identified as gifted eligible following the administration of the CogAT® in the 2022-2023 school year.

CogAT® Plan B School Year 2023

To be eligible for Plan B, students must achieve a composite quantitative and nonverbal (QN) score, a composite verbal and quantitative (VQ) score, or a composite verbal and nonverbal score (VN) in the 81st percentile or higher, and either have limited English proficiency or qualify for free or reduced-price lunch. 1,095 (7.3%) of the 14,898 students who took at least two of the three batteries qualified for Plan B, 181 more than in the 2021-2022 school year (see Table 1). One hundred and fifty-eight students have previously been identified as gifted. Therefore, 937 students were identified for further screening for gifted eligibility through the 2023 administration of the CogAT®. One hundred thirty-two (14%) students who met Plan B requirements were referred, screened, and identified as gifted eligible following the 2022-2023 administration of the CogAT®.

Scale specific summaries for the 2022-2023 school year are presented below and in the attached appendices.

CogAT® Standard Age Score Results School Year 2022-2023

Broward County second grade students scored slightly higher on average on the Standard Age Scale (SAS) in all three tested areas in school year 2023 compared to 2022 (Verbal, Quantitative, and Nonverbal) (see Table 2).
