DEFINITIONS

Ideas on How to Use:
- Post character trait & definition around the school campus.
- Teachers use definitions to help students understand the meaning of the character development trait.

Demonstrating good cooperation is being a person who understands that the good of the group is more important than the good of the one. Learning how to cooperate will help with success in school, in relationships with friends and in life over all. Listening carefully to others is the first step in demonstrating cooperation. It is essential to remember that cooperation is a basic life skill that assists us in working together so that collaboration and creativity will ultimately bring about success.

Definitions:
- A willingness and ability to work with others to accomplish a common goal.
- To act or work with another or others; act together or in compliance
- To associate with another or others for mutual benefit
- A problem-solving interaction among the group members that is largely beneficial to all those participating.

QUOTATIONS

Ideas on How to Use:
- Display a quote each week. Share on morning announcements.
- Teachers post quotes in classrooms.
- Have students write about what the quote means to them.
- Have primary students draw a picture to go with the quote.
- Encourage students to create their own ‘quote’ that promotes monthly trait.

Ideas on How to Use this Section:
- Promote school-wide service learning initiative/campaigns using provided ideas. (Do a ‘service day’; encourage classes to do random service acts of kindness to other classes/staff, etc.)
- Engage school clubs/student council to lead service projects.

School Service-Learning
- Conflict Resolutions Lessons
Have students prepare and teach to younger students lessons about powerful conflict resolution. Students can include role-plays about cooperation in their lessons.

Hands-on Activities/Projects

Human Knot
Divide the class into two groups of about fifteen students each. Have the students in each group form a tight circle facing inward. Each person is to reach across the circle and take the right hand of someone in the circle not next to him or her and then the left hand of someone else not next to them. No one should be holding both hands of another person and no one should have his own arms crossed. The cooperative task is to untangle himself or herself without anyone in the circle letting go of a hand. They will end up back in a circle if they are successful. Some of the participants may be facing out instead of in. If they succeed, ask if a natural leader emerged and why the group automatically followed or challenged the natural leader. If no natural leader took over, ask the group to describe the process of untangling through equal suggestions.
